

# OT/IoT Cybersecurity Management Service

---

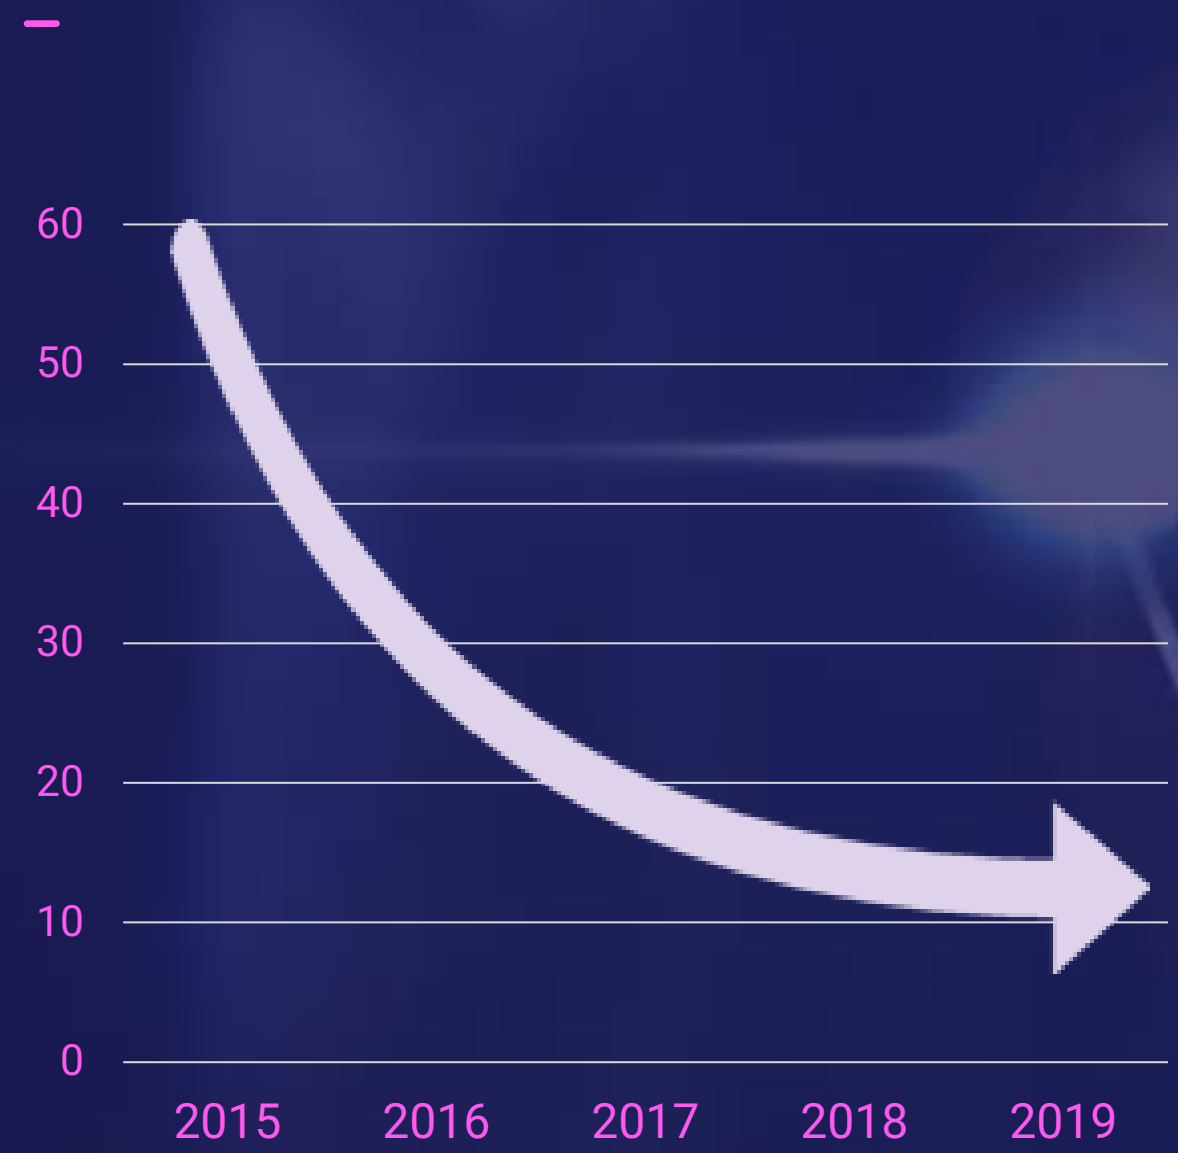

# Generic Status of Devices in the Health Sector

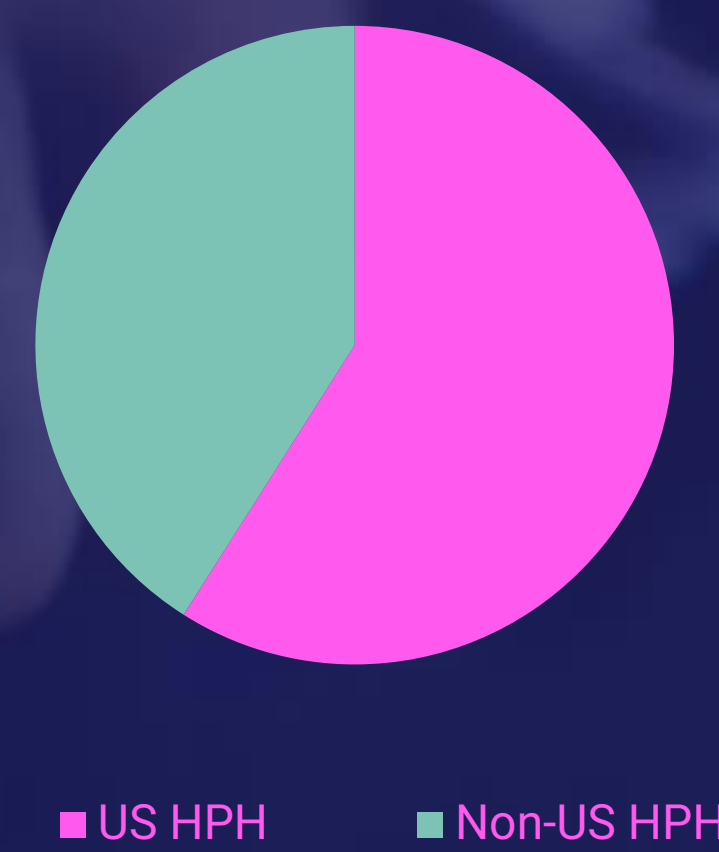

# State of threats in the Health sector

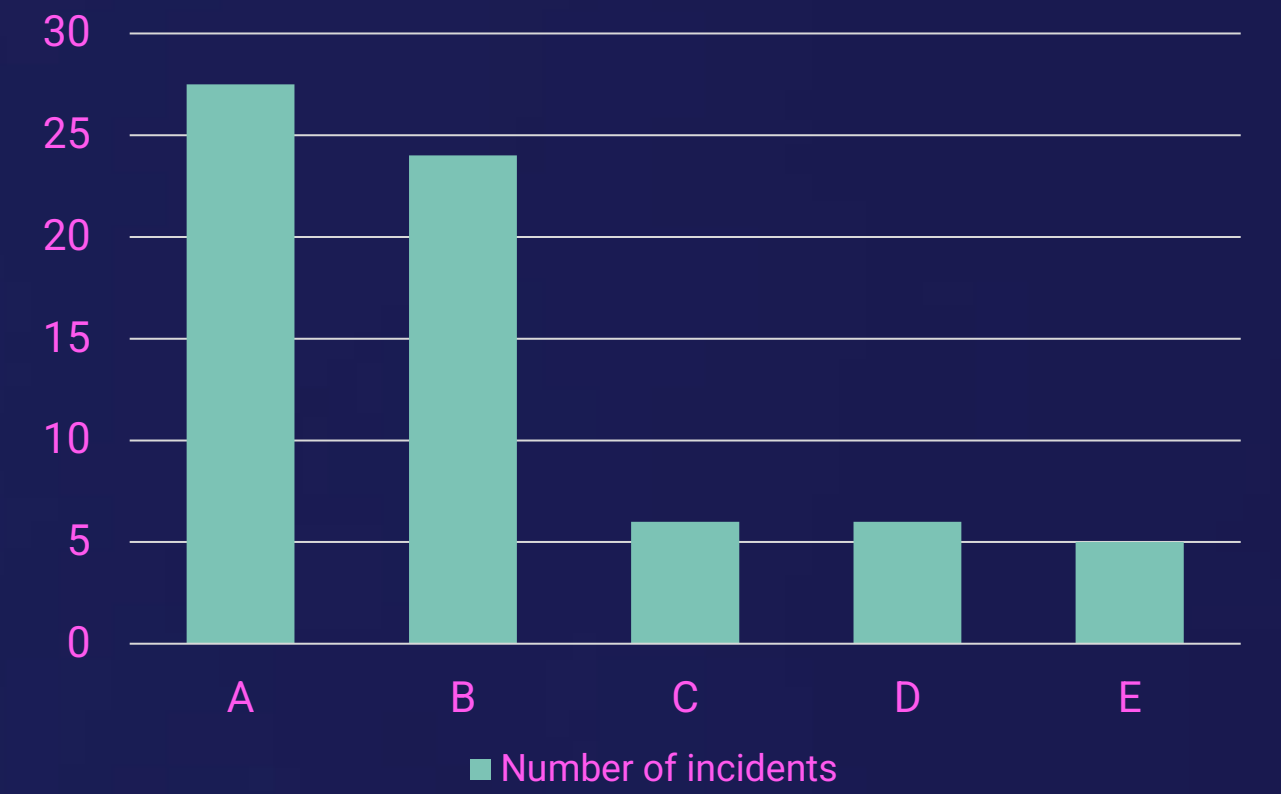

Attacks are faster than we can see\*

RANSOMWARE is growing in the healthcare environment\*\*

All health settings are being affected

- A. Clinical
- B. Industrial health services
- C. Hospital
- D. Pharmaceutical
- E. Geriatric Hospitals

# What is required: Contextualized and nested state

# Why do you need this service?

## Actual inventory in the CMDB

- ✓ Intelligent and dynamic scanning of devices when joining the network
- ✓ Deployed in three hours

## One-Click Compliance Actions

- ✓ Improving availability through preventive triage of network failures
- ✓ Visibility and context in seconds

## Detection and management of anomalies and vulnerabilities

- ✓ Clinical workflow enhancements for high-revenue stream procedures
- ✓ Drastically reduces manual operations

# What do we do?

## VISIBILITY

We see and secure everything that exists and transmits over the network

## INFORMATION

We align and unify all the security objectives of your company or service.

## ACTION

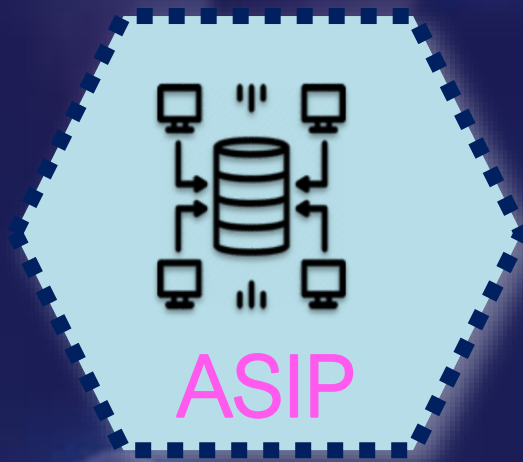

We remediate and eliminate threats in real time

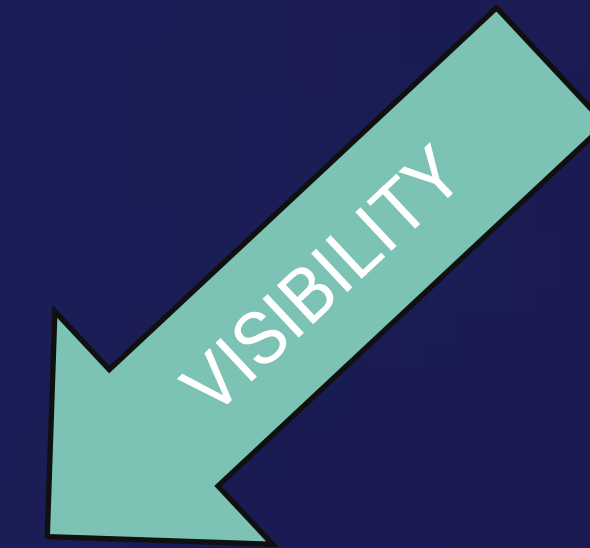

# What do we do?

**MONITORING  
MITIGATION**

**SOC**

**ASIP**

**Platform manages IoT/OT**
